

# Friends of Bonobos

Coloring Book

[bonobos.org](http://bonobos.org)

Bonobos are only found in the Democratic Republic of Congo.

Did you know? In the wild, bonobos stay by their mother's side for 3-5 years!

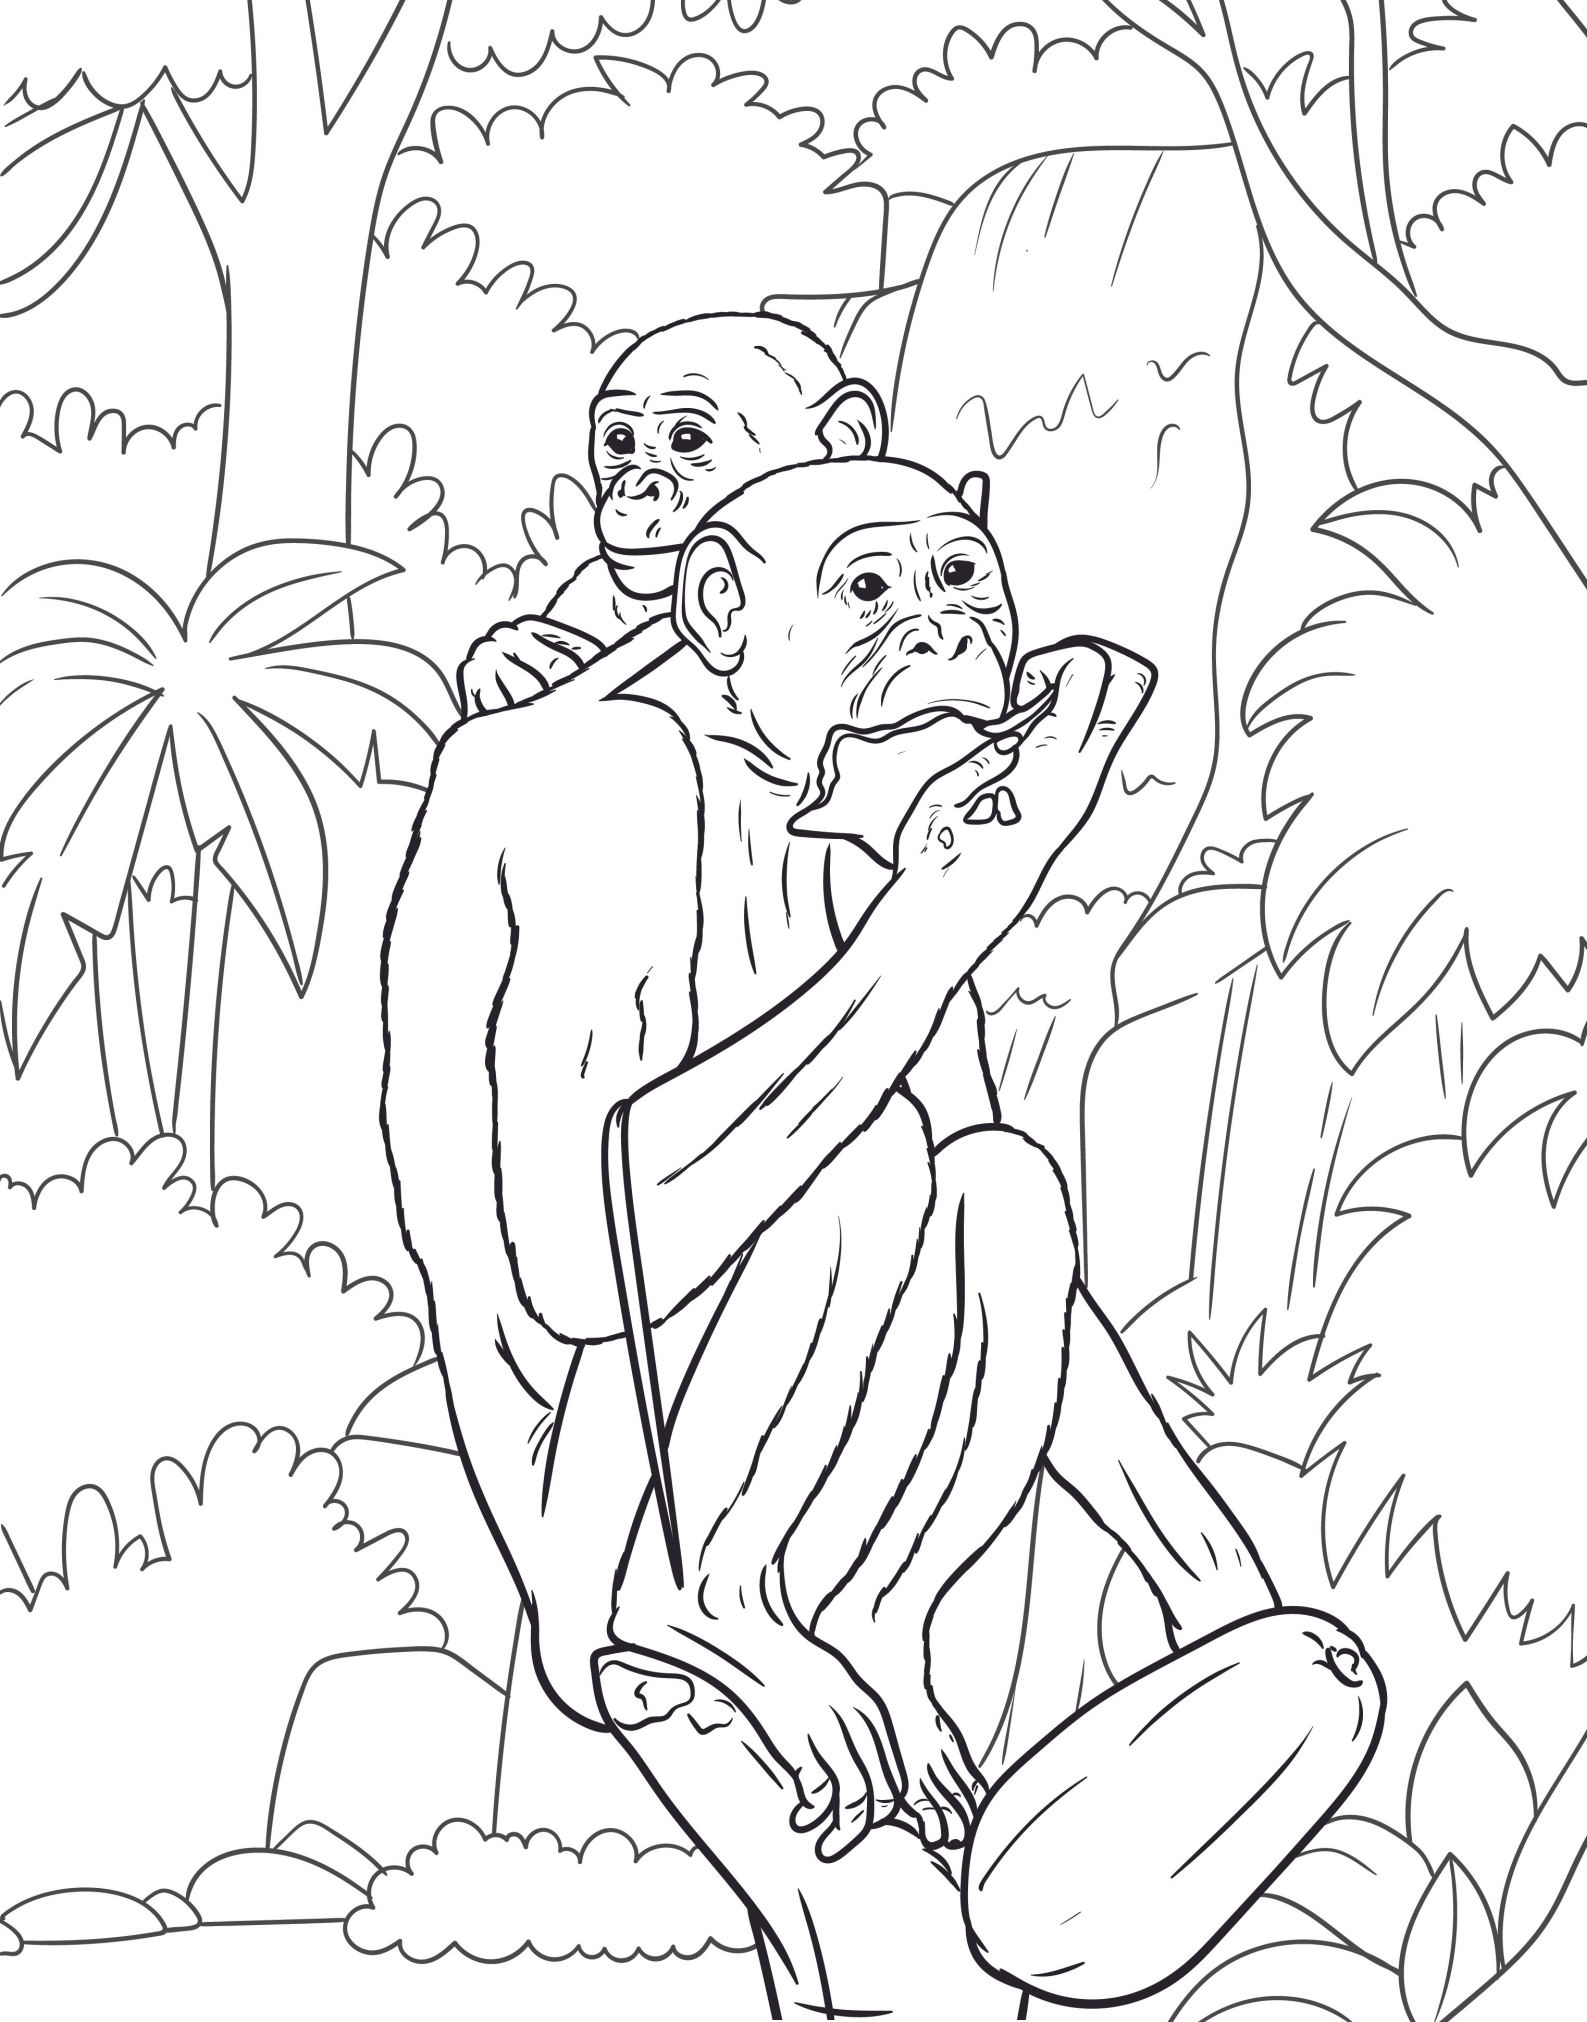

Bonobos are very maternal,  
this means that they are great  
moms and take care of each  
other's babies, too!

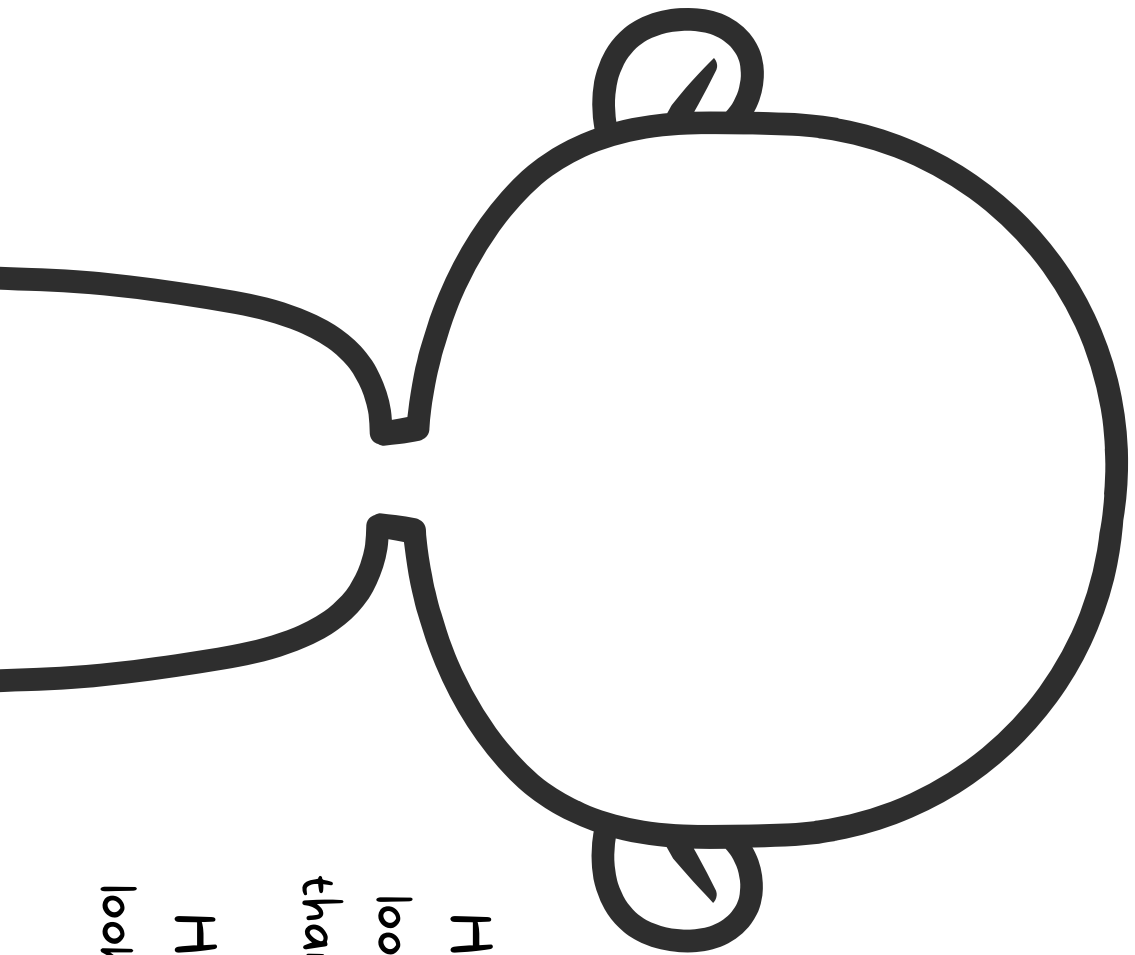

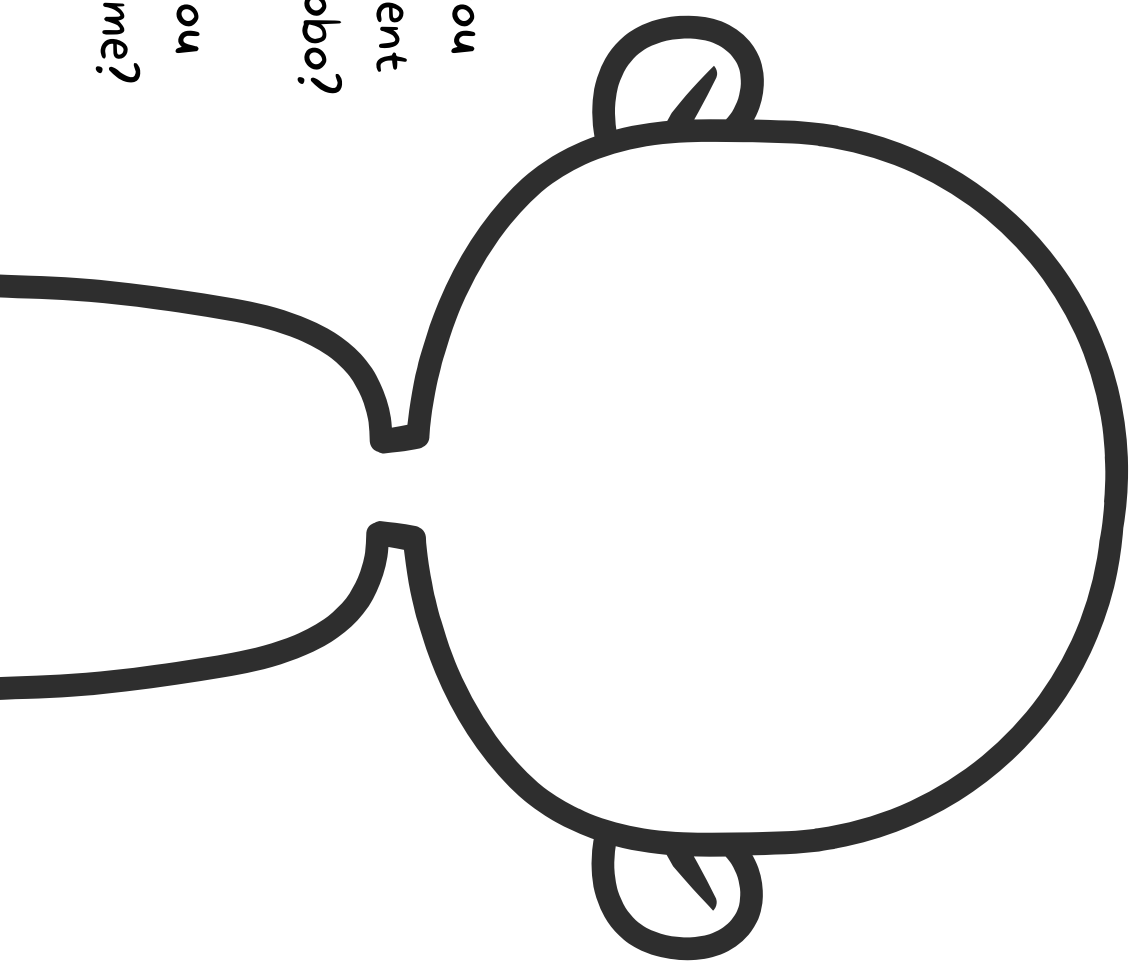

Bonobos are very social, and  
always share with their friends.

Me

Bonobo

How do you  
look different  
than a bonobo?

How do you  
look the same?
